ABOUT ME

Python Developer Intern with a passion for building and optimizing backend systems. I have experience in Python, Django, REST APIs, SQL databases, and automation scripts. I enjoy solving technical problems, understanding system workflows, and developing scalable solutions.

My focus areas include:

- Backend development (Django/Flask)
- APIs & microservices
- Database design (PostgreSQL / MySQL / MongoDB)
- Git/GitHub & version control

I'm actively looking for opportunities where I can contribute to meaningful projects, expand my technical skills, and learn industry best practices.

EDUCATION

Shivaji University Kolhapur.

Bachelor Of Science in Statistics | 2021-2023 | 90.08%

Master of Science in Statistics | 2024-2025|

WORK EXPERIENCE

Intern Full Stack Python Developer :

sagveek Tecchnologies Pvt.Ltd. | Nov 2025 - Present

Developing and maintaining Python-based modules under the guidance of senior developers.

Building and testing backend APIs using Django / Flask / FastAPI.

Writing clean, efficient, and reusable code for real-time applications.

Working with MySQL/PostgreSQL/MongoDB for data storage, queries, and optimization.

Assisting in the development of REST APIs and integrating them with frontend.

Debugging existing code, identifying issues, and helping improve performance.

Creating automation scripts to streamline internal processes and data workflows.

Collaborating with the development team using Git/GitHub for version control.

Participating in daily standups, sprint planning, and code review sessions.

Documenting modules, API endpoints, and technical processes for internal reference.

TECHNICAL SKILLS:

- **Programming Languages :** Python ,SQL
 - **Frontend Technologies :** HTML, CSS
 - **Backend Frameworks :** Flask, Django
 - **Libraries :** Pandas , Numpy , Matplotlib , Seaborn
 - **Developer Tool & Platform :** GitHub, jupyter Notebook, VS Code
 - **Data Analysis Tool :** Excel & Advance Excel , Power Bi , Tableau
 - **Certifications :** Full Stack Python Developer , Data Analysis
-

PROJECTS:

Blog Management System :

- Developed a full-stack Blog Management System using Django, Django REST Framework, HTML, CSS, JavaScript, and Bootstrap.
- Implemented CRUD operations for blog posts and comments with secure authentication and role-based access control.
- Designed and managed database models using Django ORM with proper validation and error handling.
- Built a responsive and user-friendly interface while optimizing application performance and usability.

Personal Portfolio – Flask | HTML | CSS :

- Developed a responsive personal portfolio website using Flask, HTML, and CSS to showcase projects, technical skills, and professional experience.

Flask User Authentication System | Python, Flask, SQLite/MySQL, HTML/CSS:

- **User Authentication:** Built secure signup, login, and logout features using Flask-Login.
 - **Password Encryption:** Implemented secure password hashing using Werkzeug to protect user data.
 - **Database Storage:** Managed user credentials and profiles using an SQLite database with SQLAlchemy.
 - **Route Protection:** Restricted page access to authorized users only using secure decorators.
-
