

DEVENDRA NIKAM

Full Stack Python Developer

+91 907-573-6268 • nikamdevendra1004@gmail.com • Pune, India

PROFESSIONAL SUMMARY

Results-driven Full Stack Python Developer with hands-on experience building and optimizing backend systems using Django, Flask, and REST API. Proficient in REST API development, relational and non-relational database design, authentication, role-based access control, and automation scripting. Demonstrated ability to write clean, reusable code and collaborate effectively in agile development environments.

TECHNICAL SKILLS

Languages	Python, SQL
Backend Frameworks	Django, Flask, REST API, Django REST Framework
Frontend	HTML5, CSS3, JavaScript, Bootstrap
Databases	PostgreSQL, MySQL, MongoDB, SQLite
Libraries	Pandas, NumPy, Matplotlib, Seaborn, SQLAlchemy
Tools & Platforms	Git, GitHub, VS Code, Jupyter Notebook, Postman
Data & Analytics	Excel, Power BI, Tableau
Certifications	Full Stack Python Developer Data Analysis

WORK EXPERIENCE

Full Stack Python Developer Intern | Sagveek Technologies Pvt. Ltd.

Nov 2025 - Present

- Developed and maintained Python-based backend modules using Django, Flask, and REST API under senior developer guidance.
- Built and tested RESTful APIs integrated with HTML/CSS frontends, improving end-to-end data flow.
- Designed and optimized database schemas and queries using MySQL, PostgreSQL, and MongoDB.
- Wrote clean, reusable automation scripts to streamline internal workflows and data processing pipelines.
- Debugged production issues, identified root causes, and proposed performance improvements.
- Participated in daily standups, sprint planning, and code review sessions following agile methodology.
- Documented API endpoints, module architecture, and technical processes for internal knowledge base.
- Collaborated using Git/GitHub for version control, branching strategies, and team code merges.

PROJECTS

Bookstore E-Commerce Website | Django • Django REST Framework • HTML • CSS • JavaScript • Bootstrap

- Built a Django-based e-commerce website with book catalog, product details, cart workflow, checkout flow, and order management.
- Implemented authentication, Django ORM models, admin management, and CRUD operations for books, categories, users, and orders.
- Created responsive Bootstrap pages with search/filter features and optimized database queries for a smoother user experience.

Library Management System | Django • SQLite/MySQL • HTML • CSS • Bootstrap

- Developed a library management application to manage books, members, issue/return records, availability tracking, and overdue status.
- Designed normalized Django ORM models with validation for book inventory, member details, and transaction history.

Role-Based Authentication System | Django • Django Auth • SQLite/MySQL • Bootstrap

- Implemented secure signup, login, logout, password hashing, and session-based authentication using Django authentication.
- Configured role-based access control for admin, staff, and user dashboards with protected routes and permission checks.
- Validated forms, handled authentication errors, and restricted unauthorized access to sensitive application pages.

Blog Management System | Django • Django REST Framework • HTML • CSS • JavaScript • Bootstrap

- Developed a full-stack blog platform with CRUD operations for posts and comments, secure authentication, and role-based access control.
- Designed Django ORM models with proper validation, error handling, and database relationships.
- Built responsive UI with Bootstrap, optimizing application performance and user experience.

Personal Portfolio Website | Django • HTML • CSS

- Built and deployed a responsive portfolio site showcasing projects, technical skills, and professional experience.

EDUCATION

Master of Science in Statistics | Shivaji University, Kolhapur

2023 - 2025

Bachelor of Science in Statistics - 90.08% | Shivaji University, Kolhapur

2020 - 2022

LANGUAGES

English • Hindi • Marathi
